## Getting on the property ladder

At Lilywhite Mortgages, we know buying your first home is a big step - and it's okay to feel unsure about where to begin.

That's why we've created this guide to gently walk you through the process one step at a time

We believe in making things simple, not stressful.

So, let's get started - with Lilywhite by your side, you'll know exactly what to expect and how to take the next step with confidence.

## What is a mortgage?

A mortgage is a type of loan used to buy a home. You borrow money from a lender, then repay it over time - in monthly instalments - with interest\*

We will look closely at your income and regular spending to work out how much you're likely to be able to borrow. This helps ensure your mortgage is affordable and tailored to your circumstances, so you can move forward with confidence.

You will also need to think about your deposit - this is the amount that you need to put down towards your new home.

\*The mortgage you take out will be secured against the property, so if you do not keep up with your mortgage repayments your home will be repossessed.

We will be in contact with you regularly to keep you and your mortgage on track

## Top 10 tips to prepare you for your mortgage

### **1. Bank Statements**

Avoid adding joke references to transferred money. If you're splitting a pizza, or booking a holiday, make sure that's what it says on the account.

### **2. Frequent Flutters**

An occasional dabble on the lottery shouldn't spark concern, but large amounts dedicated to gambling may cause concern for your lender.

### **3. Deposit**

**Paper Trail** If you've been gifted your deposit, or a sum towards it, make sure you keep a record of bank accounts it has passed through and where it came from to avoid delays in processing your application.

#### **4. Overdraft use**

Avoid using overdrafts where possible, check your agreed limit and make sure you stay within this. An overdraft could indicate that you are reliant on this to support your lifestyle.

#### **5. Deferred payments**

Avoid as much as possible as this can be viewed as you having a reliance on short term lending to support your life style (these are where the company offers to allow you to pay in instalments).

#### **6. Pay Day Loans**

Avoid using them if you can. This shows a reliance on short term credit and therefore could look like you are not able to afford your payments/bills etc.

#### **7. New Credit Agreements**

Avoid if possible! This can flag to a lender that you have recently taken credit again to support your lifestyle.

## **8 Payment History**

Keep up to date with your payments, set up direct debits wherever possible and remember that some payments are due every 28 days and not monthly.

## **9. Direct debits**

Do not cancel until you are sure you have paid the final bill (for example mobile phones).

## **10. Credit card balances**

Keep them as low as possible and avoid being close to your credit limit.
